# Marks

- **Number of marks possible:** In Neovim (and Vim), you can set 52 normal marks in total:

Type	Count	Range	Description
Lowercase marks	26	'a to 'z	Local to the current buffer (each buffer has its own set).
Uppercase marks	26	'A to 'Z	Global across all buffers (refer to specific files).

- **Special marks:**

Mark	Meaning
”	Last jump position
’	Last change
’[ / ’]	Start / end of last change or yank
’< / ’>	Start / end of last visual selection
’0 – ’9	Last file positions (older jump list entries)
”””	Last exit position in a file
’<’ and ’>’	Visual selection start/end
